

June 4, 1954

Memorandum to

Dean C. A. Elvehjem
Graduate School

Concerning: Aleck Bernstein, M.D.

Dear Dean:

This is to review our telephone conversation of this date on the appointment of Dr. Bernstein to the rank of instructor with substantially full-time salary while he remains in candidacy for the Ph.D. As indicated, the candidate already holds an M.D. and Dipl. Bact. (London) for which he should be entitled to at least one year's transfer credit. He will be in residence here from September 1953 to June 1955, that is for four regular sessions and one summer session. It will therefore be essential that he qualify for full-time residence credit during his appointment. In view of his qualifications, and the fact that he is spending substantially full time on his thesis research, and has no teaching obligations, my understanding of our conversation is that he will be permitted to qualify for fulltime residence credit.

Yours sincerely,

Joshua Lederberg
Associate Professor of Genetics
